

YOU HAVE FINISHED YOUR MATRICULATION, SO WHAT NEXT?

At the ESETA we will provide you with an answer if you want to do an engineering related qualification in water or electrical engineering. Your first step is to identify what you want to do. If you have an analytical mind or like working with your hands you should talk to us. The ESETA may fund your training 100%, and above that, may also offer you a stipend to keep you going during the course of your studies! The energy and water sector is waiting for you, and opportunities for growth are endless.

Even if you have a grade 7 or limited education, we can still make your dream come true, with our ABET and formal programmes. Give us a call or visit our offices nearest to you.

Energy SETA does not offer training or tuition, but provides funding.
Please do not hesitate; we are waiting for your call!
